April 3, 2020

Dear Colleagues,

**Organizers' Announcement towards the 11<sup>th</sup> JSP-CSP-KSP Joint Symposium on Pharmacognosy**

First of all, we would like to send our deepest sympathies to the CSP/KSP colleagues for any direct/indirect affection from the current coronavirus pandemic problems.

Following the official announcement and launch of the Symposium homepage in last November, subsequent preparations until this January had been made very smoothly, including our honorable arrangements on the President Lectures of Prof. Shi-Shan Yu (CSP) and Prof. Sang Kook Lee (KSP). In spite of emerging concerns with the infectious problems, we have made further arrangements on the special session, "Quality Assurance & Therapeutic Evidence of Traditional East Asian Medicinal Products", as well as opening of the registration and calling for posters at the beginning of April. We would like to thank all those whom we are currently in contact with in CSP/KSP for their thoughtful efforts.

Unfortunately, the current situations in Tokyo are still unpredictable, and not only Tokyo Olympic & Paralympic Games 2020, but also major events/gathering activities during this summer are mostly being cancelled/postponed in Japan.

We are in contact with the JSP board members 2020 to announce any alternative plans based on our 'safety-comes-first' policy and unshakable hope to organize the joint symposium.

We sincerely ask your understanding and cooperation.

Yours sincerely,

*Koji Ichinose, Ph.D.*

*Chair, the Executive Committee,*

*The 11<sup>th</sup> JSP-CSP-KSP Joint Symposium on Pharmacognosy*

*Director and Professor*

*Research Institute of Pharmaceutical Sciences and Faculty of Pharmacy*

*Musashino University*

*Tokyo, Japan*
